

PROFILE

PhD in Natural Language Processing, specialised in generating and evaluating **synthetic clinical data** under privacy constraints. Research bridges large language models, the privacy–utility trade-off, and downstream medical tasks (clinical entity extraction, ICD coding). Open to research roles in industry or academia.

EXPERIENCE

May 2022 — 2026	PhD Researcher (CIFRE) · Arkhn / Inria Almanach · Paris, France Thesis: privacy-preserving synthetic clinical document generation with LLMs. Facsimile documents, DP fine-tuning and iterative DPO, linkage/proximity privacy attacks, ICD-9 and semantic-similarity downstream evaluation. Defended 17 June 2026.
2020 — 2022	NLP Data Scientist · 360 medics · Lyon, France Low-resource clinical NER on French medical data: semi-automatic annotation strategies, transformer deployment and latency optimisation, rule/classifier baselines.
2019 — 2020	Developer / Analyst · Orange · Nancy, France Infrastructure test-automation software: functional specs, migration of the architecture to Kubernetes, continuous-integration setup.
2019	Research Engineer · University of Glasgow, School of Computing Science · Glasgow, UK Natural language generation for social robotics — socially intelligent robotic agents.
2015 — 2019	NLP Engineer · CNRS — ATILF · Nancy, France Linguistic pipelines for ISTE/TERMINITH (terminology extraction & disambiguation, XML/TEI), technical lead on CoReA2D semantic-annotation tooling, Démonette web resource.

EDUCATION

2014 — 2015	M.Sc. Cognitive Science & NLP · Université de Lorraine
2013 — 2014	M.Sc. Cognitive Science · Université de Lorraine
2009 — 2012	B.Sc. Cognitive & Computer Science · Université de Lorraine

SKILLS

Languages	Python, Java, LaTeX/Typst, SQL
ML / NLP	PyTorch, Lightning, Transformers, spaCy, LLM fine-tuning (SFT/DPO), differential privacy
Infra	Docker, Kubernetes, Git, CI/CD, Google Cloud Platform
Spoken	French (native), English (fluent)
